

Covid Monitoring Cell

Activity Report 2021-2022

In the academic year 2021-2022, the Covid monitoring cell has been able to carry out excellent activities. Students were allowed to enter the college only on the days of university examination. In those days, teachers were assigned to monitor the children.

After thermal scanning, the children entering the college were properly monitored to wash their hands. Similarly, after the examination, the teachers were instructed to send the students out of the college without standing in groups and also appointed teachers for that purpose.

As part of the opening of the college in October, the monitoring committee assigned various tasks to the teachers. The teachers were given monitoring duty in the morning to observe the children entering the college and squad duty to observe them during the breaks.

Apart from this, the things to be followed by the teachers and students were given through messages as well as instructions were prepared on posters and it is placed in different areas of the college.

Since the college was reopened after a long period, various clubs conducted student centered programs. For each program, the teachers were given duty to ensure that the Covid protocol are followed during the programs.

In order to assign each and every duties, the meeting of the monitoring committee is held at regular times under the supervision of the College Principal and the decisions are taken after discussing with the members.

The meetings were attended by Panchayat representative, members of health department, PTA president as well as teachers in the monitoring committee.
