**8. Objective of the Program:** To conduct a comprehensive medical survey in the adopted village to identify prevalent health issues, assess the health needs of the community, and gather data on common diseases, nutritional deficiencies, and access to healthcare services. To raise awareness about preventive healthcare practices, hygiene, and nutrition among the villagers through health education sessions and workshops based on the findings of the survey, with the aim of improving the overall health and well-being of the community.

## 9. Detailed Description of the Event:

On 3rd March 2021, a medical survey was conducted in Ward 1 & 2 of Vadakkekkara Panchayath, as part of our community outreach efforts. The survey was executed by a team of 50 volunteers from the NSS Unit No: 47. The survey encompassed various aspects of the villagers' health, including prevalent health issues, common diseases, nutritional deficiencies, and access to healthcare services. Additionally, a digital survey was administered to assess internet connectivity in the area, recognizing its relevance in the current digital age.

## 10. Outcome of the Event/Evaluation by Program Coordinator:

The Medical Survey in the Adopted Village of SNM College provided data on the health needs and issues faced by the community in Ward 1 & 2, serving as a foundational resource for future healthcare initiatives and interventions. The event fostered community engagement and participation, allowing residents to contribute to decision-making processes concerning their healthcare. This approach empowers the community to prioritize their healthcare concerns. This initiative aligns with the NSS's core mission of community service and engagement. The data gathered will guide future healthcare interventions, leading to improved healthcare services and overall well-being in the adopted village.
